Index to Volume 37 of the Physical Therapy Review, 1957

Page numbers refer to the following issues:

January	1-68	July	425-488
February	69-120	August	489-560
March	121-192	September	561-632
April	193-272	October	633-704
May	273-344	November	705-768
June	345-424	December	769-836

Scientific articles, news items, and feature materials are listed by subject; book reviews are listed by author and subject. Scientific articles are in italics; book reviews are in quotation marks.

The-People-to-People Program Committee for the Handicapped

The Committee for the Handicapped was formed at the request of President Eisenhower as one of 41 People-to-People Program Committees. It has adopted the following three objectives:

1. Stimulate and facilitate by all available media a continuing exchange of information on technics, treatments, devices, and procedures in rehabilitating crippled children and adults and in employing the handicapped of all nations. Such interchanges should include stimulation of counterpart organizations and activities in and between the U. S. and other countries.
2. Through all available media, including direct correspondence and other personal means, project abroad an understanding of U. S. activities for the handicapped to show that they are a natural outgrowth of the spiritual and moral character of the American people and an evidence of our respect for human dignity.
3. Utilize and strengthen existing programs of U. S. organizations relative to their interest in international programs for the handicapped.

The keynote to action was sounded by Gen. Maas at the first meeting of the Committee for the Handicapped, when he told members:

"We have an opportunity to do something in the way of action that will demonstrate to the whole world the superior benefits of democracy, to show to the world that under democracy we care about people. Probably the greatest distinguishing characteristic between communism and democracy is the attitude toward people. Nowhere is the humanitarian attitude toward people better demonstrated than in what people do for their unfortunates, their handicapped, and our program in this country, of rehabilitation and the ultimate objective of rehabilitation —a suitable job for the man or woman who has been given vocational training—will certainly make a tremendous impression on the rest of the world, and certainly in the Asian and African world, where such large numbers of their people are physically handicapped, and where traditionally for centuries, nothing has been done for them."

The Committee for the Handicapped welcomes cooperation from all professional and volunteer workers in the fields of rehabilitation and employment of the handicapped, particularly those whose business or personal contacts make it possible for them to travel abroad.

on guard

Yes, she's never off duty in guarding family health. She balances the family diet, takes the children for their "shots," prods her husband to get his annual checkup. But what about *her* health?

Caring for herself is the greatest gift a woman can give her loved ones.

So don't delay — see your doctor about *your* checkup. It's "*living insurance*" against cancer.

AMERICAN CANCER SOCIETY
